Entry into Serbia with negative PCR test or self-isolation

Belgrade, 12 May 2020

The Serbian government adopted today a protocol for the entry of Serbian citizens and foreign nationals into the Republic of Serbia, in accordance with the epidemiological situation and the protection of the population from infectious disease COVID-19.

Serbian citizens can enter Serbia and move without restrictions with a negative PCR test for coronavirus not older than 72 hours. If they do not have the test with a negative result, all our citizens, without exception, will be obliged to self-isolate at home for 14 days.

Foreign nationals can enter the Republic of Serbia under two conditions - a negative PCR test for coronavirus not older than 72 hours and a permit issued by a commission consisting of representatives of the Ministry of Health, Ministry of Construction, Transport and Infrastructure, Ministry of Foreign Affairs and the Ministry of the Interior. This permit is issued by the Serbian embassy or consulate in the country from which a foreign national arrives.

The COVID-19 Crisis Response Team recommended the government to fully open the borders for the persons coming from four neighbouring countries - Bosnia-Herzegovina, Albania, Montenegro and North Macedonia as of 1 June.
