Intro

Even since our founding, in 1998, SEA CONTAINER SERVICES has been one of the most important port services providers in the Port of Constanta, establishing itself as a reliable partner for all those involved in intermodal transport.

Besides the other companies that are part of the SEA CONTAINER GROUP (Sea Container Shipping & Logistics and Container Clearance Services), our company offers a range of integrated services in the field of port operations that are constantly adapted to our partners demands.

Taking advantage of a young and dynamic team, SCS is successfully managing the increasingly complex challenges of intermodal transport, striving during each project to find the best operating solutions for our partners.

Services

Range of services provided by Sea Container Services:

Discharge/loading operations for sea and river vessels

Discharge/loading operations for rail wagons

Storage of general cargo, bulk and unitized, in warehouses and open platform, as bonded warehouse facilities, under 24/7 security and video surveillance

Handling of containerized cargo, stuffing/unstuffing operations

Bagging, palletizing, packaging, wrapping, labeling operations

Weighing of trucks

RO RO operations

Customs brokerage and ship agency services through our sister-company Container Clearance Services

Equipment

The SCS terminal takes advantage from having one of the largest and diverse line-up of machinery and equipment, capable of handling most type of cargo in the Port of Constanta:

- 2 Liebherr mobile cranes, 104 tons capacity each;
- 3 reach stackers, 46 tons capacity;
- 3 Sennebogen cargo handlers;
- 30 forklifts, capacities between 2 and 32 tons;
- 4 front loaders;
- Trucks;
- Tug master trucks;
- Mobile platforms for stuffing/unstuffing containers;
- Special devices for handling various types of cargo(project-cargo, metallurgical products, bulk cargo and bagged/palletised cargo).

Storage

SCS provides our clients with storage spaces adequate for most type of cargo transiting our terminal. In order to cover the ever-increasing demands, investments were made in expanding our storage capabilities in the Port of Constanta/South.

There are currently 175 000 square meters of open platform and 15 000 sqm of covered warehouses. All storing facilities are under 24/7 security and video surveillance.

Operational berths

The ship operations are carried out in 2 operational berths:

Berth 119 – length 308 meters, water depth 13,5 meters, served by a concrete storing platform of 22 000 square meters.

Berth 120 – length 205 meters, water depth 13,5 meters, concrete platform of 36 000 square meters.

Our team

The SCS team consists of around 290 employees (both white & blue collar workers), which combines experience with professionalism and are able to cope at all times with the challenges of each individual project. Our employees are permanently being trained in order to improve their skills, their safety and the condition of the handled cargo being our main concern.

Certifications

Our activity is certified by Bureau Veritas for the Quality Management System according to the ISO 9001: 2015 Standard.

Project Cargo

Containerized Cargo
