

# WORKSHOP '17

8th June, 2017

*Budapest*

# *Combined initiative of*

Karla Pejs,

European  
Coordinator

Cabinet of  
Com.

Violeta Bulc

Cabinet of  
Com.

Karmenu Vella

Cabinet of  
Com.

Corina Cretu

creation of  
METEET

with a concrete  
proposal outlining  
the ideas and  
objectives

# METEET:

**M**ixed

**E**nvironment

**T**ransport

**E**xternal

**E**xperts

**T**eam

Based in the current **Grant Agreement** with DG MOVE one of the work pillars foresees

**the establishment of a pool  
of technical experts**

**combining relevant expertise of  
various sectors of infrastructure  
development,**

**e.g. river engineering, EIA,**

**permitting procedures etc.**

# Environmental situation of many sections of the Danube is problematic

key objective of TEN-T corridor „Rhine Danube“ is to guarantee **GNS**,

**but** without negative impact on the environmental status of the river

# This is why the main objective of METEET is

to provide support

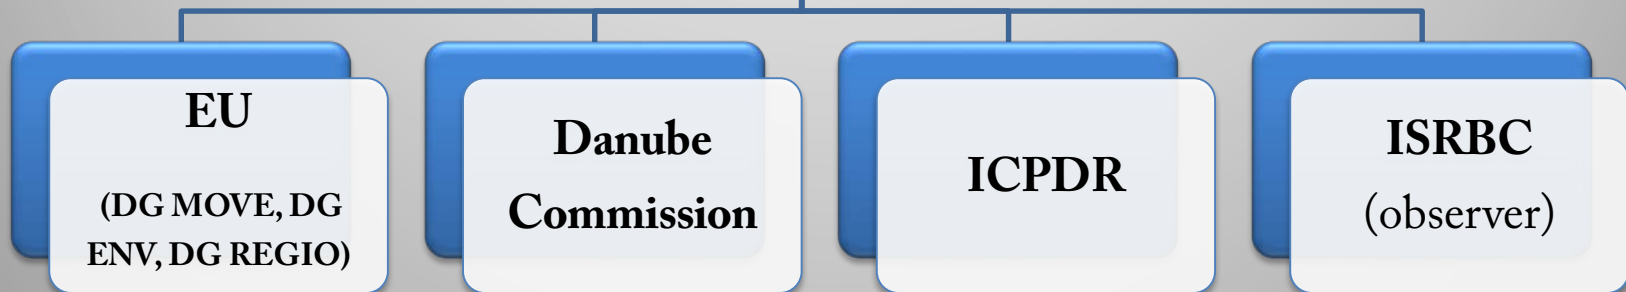

in addressing the  
environmental issues  
that may arise

during planning and  
implementation of  
IWT-projects in the  
Danube Region

in a multi-disciplinary  
approach

**a Steering Committee(SC) of  
METEET has been established  
consisting of the following parties:**

**Terms of references ( ToR) have been agreed upon for the SC and the Experts to be involved in the training missions**

- DC / ICPDR advertised for **transport** and **environmental** experts to serve later as experts for a pilot training mission in a volunteering country

- In the course of the 2. SC meeting two experts were selected and the **volunteering country** has been accepted

- A first pilot training mission will start in Vukovar, Croatia by end of September 2017.

- the audience will consist of officials and employees of the national ministries and authorities of transport and environment of the host country

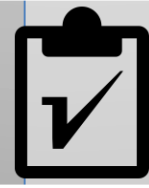

# ***Work Plan*** for the expert team for a two-day-seminar contains:

presenting and analyzing the European legislation and guidance in its entirety for both sectors Transport and Environment and its application

Advice on good practices in the EIA of inland navigation projects mitigating negative impacts

reporting on the feedback of the action

*Thank you for your attention!*
